Directions for question 1 to 4:

Study the following passage carefully to answer the questions that follow each passage:

PASSAGE I

Chinese Goods sight now make up less than 3% of India's imports and if the figures are sight they are growing at no more than 25% a year. So, why is everyone making such a hue and cry over the Chinese threat? Aren't Indian Industrialists merely trying to get more tariff protection by stoking Xenophobia? Probably some are. But that should not divert attention from the main point: China has finally shown up on India's economy rodar screen and it needs to be watched.

The figures may not yet reflect, but anecdotal evidence points to the fact that China is weighting heavily on the minds of the manufacturing industry. Even if you discount all the praying and petitioning for protection there is enough indication that increasing number of businessmen are to dag looking of setting up operations in China. IN other words they are putting their money where their mouth is: If you are in manufacturing, Industry. Even if discount all the praying and petitioning for protection, there is enough indication that increasing number of businessmen are today looking at selling up operation in China. In other words they are putting their money where their mouth is: if you are manufacturing if makes for more sense to operate out of China than out of India.

According to news paper reports. Ajanta the world largest clock maker is shifting its manufacturing base tools, stock and travel from morb in Gujarat's Saurashtra region to Shenshen in china. Many other Indian companies, from Bajaj electricals to Blow plast are looking at options that range from setting up their own operations in China to starting joint ventures to out sourcing. What we have seen so far could be just the tip of a bigger trend: there are lot more Indian companies central around three fourth of China's exports Only one fourth of its exports consists of goods made by Chinese owned companies and that store is shrinking, according to the wall street journal.

In other words, China's amazing export performance is due to its ability to gell itself as the perfect base for global manufacturing. This puts the issue in a larger context. This is the largest term issue that should engage the attention of policy makers, more than the flood of imported goods from China.

It is almost as if focusing on export means lettering down the country, just as rupee depreciation, in some quarters is take a man rational emasculation? Focussing on exports will mean a lot of things policy makers only need to talk to Indian firms who are chocking out China to got a laundry list of needs. There is of course, another way of looking at all this China competitive advantages lie in its manufacturing towers, India's advantages lie in services powered by its highly skilled English speaking man power. It is only natural therefore, that even as India in on the way to becoming the global back office for the world, China is becoming the global manufacturing base. We believe that this line of thinking is misleading. The only thing that prevents India from becoming a global manufacturing base is the lick of a government that functions the way it should. Meanwhile, here's a piece of

advice for Indian businessmen. Please do what ever it takes to keep your business alive-whether it means investing in Shenzhen or outsourcing from Timbuktoo - but do think global. While the government gets act together, the country's search for new business models that skirt around existing bottlenecks has to continue. Suehdeep Agarwal's Bhartiya International, India's top leather garments exporter with a turnover of Rs. 200 crore, has been notching up 30% growth year after year by outsourcing its requirements from factories all around the world - including China. Maybe that's one way to go.

- 1. The major theme of the passage can be considered as
 - 1) India's business relations with China.
 - 2) a comparison of India's and China's exports.
 - 3) the existing anxiety regarding India's manufacturing performances.
 - 4) India's hopes for manufacturing opportunities in China.
- 2. Which one of the following can be accepted as the title for the passage?
 - 1) China's Amazingly successful Export performances
 - 2) competition between India and China for investments
 - 3) A piece of Advice for Indian Businessmen
 - 4) The Chinese Threat to Indian Industrialists
- 3. Which of the following is not correct according to the author?
 - 1) Indian industrialists concentrate more or exports and less on domestic markets.
 - 2) Many Indian companies are not trying to set up their operations in China.
 - 3) Chinese-owned companies made one-fourth of the goods exported.
 - Indian companies do not want to take the risk of setting up in china and exporting to other countries.
- 4. The author seems to believe that fast growth of industries depends on which one of the following factors?
 - 1) Liberalisation
 - 2) Effective demand of the manufactured goods in the country and in foreign markets
 - 3) The domestic market
 - 4) The record-breaking exports

Directions for question 5 to 8: Study the following passage carefully to answer the questions that follow each passage:

PASSAGE II

There is a long list of horror stories connected with the consumption of sugar-hyperactivity in children; criminal behaviour in adults; diabetes, and elevated cholesterol. There is little good scientific evidence that sugar causes these conditions, but under certain circumstances it is though to aggravate them. While the relationship between diet and health is far from an exact science, the relationship between diet and behaviour is even less clear. "There is a reasonable amount of evidence that what we eat does regulate one's brain chemistry", said Bambi Young, associate visiting professor in the Department of Epidemiology at the UCLA, "and it is more pronounced in certain individuals and under certain circumstances. The effect of food on behavior are subtle, but they do exist. There

are some people, particularly young children who are super respondents." Sugar, perhaps because it provides nothing but calories and pleasure, is high on the list of culprits. Sugar is a carbohydrate like pasta and grain. It is a simple carbohydrate; pasta and grain are complex ones. But they are worlds apart. All carbohydrates are made up of one or more simple sugars. Other names under which sugar appears are glucose (blood sugar), fructose (milk sugar), and maltose (malt sugar). Sugar is used for energy. Brain cells need it to function. Some of the glucose we take in, whether in the form of simple or complex carbohydrates is stored to be used as needed. The excess is converted to fat. Sugar, that includes all forms of honey, corn syrup, high-fructose corn syrup, maple syrup and molasses - is the number one additive in foods. It turns up in the least expected places, like mayonnaise and ketchup. Researchers generally agree that an inborn desire for sweetness begins at birth. One school of thought theories that sugar is addictive and provides a high similar to, though much lesser than, drugs. "No one knows whether one becomes addicted to the pleasure or whether sugar has an effect in the brain level," said a professor of psychiatry. "But behaviorally there are children who become very very dependent on sugar". However, for some people who are anxious and tense, sugar has a positive effect because it promotes a feeling of well-being and of alertness. Though there is a general agreement about this in the scientific community, others disagree. According to them, there can be the opposite effect. "It depends on the persons and on the situations," said Mr. Conners of Duck University. "There are huge individual differences. Though sugar dos not cause hyperactivity, uncontrollable behaviour in children, it exacerbates it." One typical scenario is the child who eats candy, cookies and cakes at a birthday party. "People are always telling me about their children who came home from a birth-day party hanging from a chandelier," said Bonnie Kaplan, an associate professor pediatrics and psychology. "Parents blame it on sugar, but birthday parties are very exciting things for children and in addition there are other things besides sugar in the food." Mr. Conners agreed that "stimulus is important," but he added, "It is hard to pin down until you realise it depends on the content of the rest of the meal."

- 5. Children's way of life renders them open to
 - 1) heavy use of sugar.
 - 2) hyperactivity after eating sweets.
 - 3) eating lots of candies, cookies and cakes.
 - 4) careful selection of food items served at a birthday party.
- There is good medical evidence that ____ will worsen their condition if they don't regulate sugar consumption.
 - 1) adult criminals
 - 2) diabetic patients
 - young sweet-eating children
 - 4) those who have cholesterol
- 7. We can have more confidence in the statement made by
 - 1) Psychiaztrists.
 - 2) Epidemiologists.
 - 3) University professors.
 - 4) Researchers in the field.

- 8. According to the facts enumerated in the passage, the common man.
 - 1) Can use sugar without any apprehension in as much quantities, as he prefers.
 - can give his healthy child as many chocolates and sweet meats and need not have any fear about the intake of sugar and other carbohydrates.
 - should be wise enough to use his discretion regulated his and his family's intake of sugar, paste and grain.
 - 4) should be wise enough to use his discretion to regulate his and his family's intake of pasta and grain.

Directions for question 9 to 11: Study the following passage carefully to answer the questions that follow each passage:

PASSAGE III

An expert group has sounded a timely warning on what environmentally destructive tourism will mean to national parks and wildlife sanctuaries and the objectives they are suppose to serve. Given the unique and rare wildlife the country has been endowed with, the rationale for using the resources for attracting tourists from abroad is unassailable. This necessarily postulates that the flora and the fauna should be protected and conserved. As a matter of fact much of the government's interst in wildlife preservation has to do with the tremendous prospect of tourist traffic on that account. Yet the risk of the revenue-earning motivation overrunning the conservation imperatives is very real, the lure of the coveted foreign exchange that goes with this business only serving to enhancing it several folds. Even with the tourist inflow far below the potential, the pressure of visitors is said to have been already felt on the tiger reserves. With the Government of India's declared intent to boost tourism quite justified for its own reasons, the need for eliminating the risk assumes a greater sense of urgency. The study team has noted that most of the 41 national parks and 165 wildlife sanctuaries surveyed are open to tourists. The less frequented among them may not require special attention immediately in this respect as much as the ones that are major tourists attraction do. These include the Sanjay Gandhi National park in Maharashtra, Nandankanan in Orissa, and Bannerghatta in Karnataka. Over a year ago, the Indian Board for wildlife expressed concern over the looming danger, and decided that the core areas of national parks and sanctuaries should be kept totally free from biotic disturbances, and the visitors be permitted to view the wildlife only from areas marked out for the purpose. And now, the expert group has come up with the suggestion that a case by case evaluation be done of the capacity as well as the limitations of all the national parks and wildlife sanctuaries and based on such assessment an areaspecific plan for tourist promotion within the safety norms be charted. That this is the most scientific way of going about the job, and that there is no time to lose can be really conceded.

- 9. Biotic disturbances in the context means
 - 1) attack from other living things, animals, etc.
 - 2) the disturbances caused by the natives on seeing the strange foreigners.
 - 3) the political disturbances causing the close down of the parks.
 - 4) disturbances caused by the wild animals on seeing the tourists.
- 10. By using the expression "environmentally destructive tourism," the author means
 - the preservation of the wild beasts.
 - 2) destruction of the wildlife and sanctuaries.

- 3) destroying the attractive sources of wild animals and birds.
- 4) the maintenance of the flora and fauna of the country.
- 11. To implement the most scientific ways of tourism we should
 - 1) get industries and talented persons trained in the field.
 - 2) form a commission and plan out how to implement the suggestions.
 - 3) send a group of scientists abroad to learn more about tourism.
 - 4) spend as much finance as possible to better fife suggestions made.

Directions for question 12 to 15: Study the following passage carefully to answer the questions that follow each passage:

PASSAGE IV

We tend to be harsh on our bureaucracy, but nowhere do citizens enjoy dealing with their government. They do it because they have to. But that does not mean that the experience has to be dismal. Now there is a new wind blowing through government departments around the world, which could take some of this pain away. In the next five years it may well transform not only the way public services are delivered but also the fundamental relationship between governments and citizens. Not surprisingly, it is the internet that is behind it. After e-commerce and e-business, the next revolution may be e-governance. Examples abound. The municipality of phoenix, Arizona, allows its citizens to renew their car registrations, pay traffic fines, replace lost identity cards etc. online without having to stand in endless queues in a grubby municipal office. The municipality is happy because it saves \$ 5 a transaction - it costs only # 1.60 to process an online transaction versus \$ 6.60 to do it across the counter. In Chile, people routinely submit their income tax returns over the Internet, which has reduced the time taken and the number of errors and litigation with the tax department. Both tax-payers and the revenue department are happier. The furthest ahead, not surprisingly, is the small, rich and entrepreneurial civil service of Singapore, which allows citizens to do more functions online than any other. As in many private companies, the purchasing and buying of Singapore's government department is now on the Web, and cost benefits come through more competitive bidding, easy access to global suppliers and time saved by online processing of orders. They can post their catalogues on their site, bid for contracts, submit invoices and check their payment status over the Net. The most useful idea for Indian municipalities is Government works, a private sector-run site that collects local taxes, fines and utility bills for 3,600 municipalities across the United States. It is a citizen's site, which also provides information on government jobs, tenders, etc. The most ambitious is the British government, which has targeted to convert 100 per cent of its transactions with its citizens to the internet by 2005. Cynics in India will say, 'Oh, e-government will never work in India. We are so poor and we don't have computers. But they are wrong! There are many experiments afoot in India as well. Citizens in Andhra Pradesh can download government forms and submit applications on the net without having to bribe clerks. In many districts, land records are online and this has created transparency. Similarly, in Dhar district of Madhya Pradesh, villagers have begun to file applications for land transfers and follow their progress on the Net. In seventy villages in Kolhapur and Sangli districts in Maharashtra, Internet booths have come up where farmers can daily check the market rates of agricultural commodities in Martathi, along with data on agricultural schemes, information on crop technology, when to spray and plant their crops and bus and railway timetables. They also find vocational guidance on jobs, applications for ration cards, kerosene/gas burners and land record extracts with details of land ownership. Sam Pitroda's World Tel, Reliance Industries and the Tamil

Nadu government are jointly laying 3,000 km of optic fibre cables to create a Tamil Network which will offer ration cards, schools, college and hospital admission forms, land records, and pension records. If successful, World Tel will expand the network to Gujarat, Karnataka and West Bengal. In Kerala, all the villages are getting linked online to the district headquarters, allowing citizens to compare the development priorities of their village with other villages in the State. Many are still sceptical of the real impact because of few Indians have computers. The answer lies in interactive cable TV and in Internet kiosks. Although India has only five million computers and thirty-eight million telephones, it has thirty-four million homes with cable TV and these are growing at eight percent a year. By 2005 most cable homes will have access to the Internet from many of the 700,000 local STD/PCR booths. Internet usage may be low today, but it is bound to grow rapidly in the future, and e-governance in India may not be a dream.

- 12. How can India overcome low penetration of computers for e-governance?
 - 1) By manufacturing more computers
 - 2) Through cable TV and Internet kiosks
 - 3) By opening more STD/PCR booths
 - 4) By making the Internet free
- 13. Which of the following has not been one of the effects of submitting income tax returns over internet in Chile?
 - 1) Reduction of legal cases
 - 2) Reduction in errors
 - 3) Increase in transparency
 - 4) Increase in number of returns
- 14. In which direction is the new and blowing?
 - 1) More and more interaction of citizens with government through internet.
 - Outsourcing the work of infrastructure creation for internet.
 - 3) Increasing the penetration of computers in rural areas.
 - 4) Integrating e-commerce, e-business and e-governance.
- 15. According to the author, e-governance in India
 - 1) is a dream and may not succeed.
 - 2) will not succeed unless more computers are owned by citizens.
 - 3) has had successful attempts and plans.
 - 4) will not work because the model is suited for developed countries.

Directions for question 16 to 20: Critically examine the statements given in italics against each question.

- 16. The world is a great book; one who does not travel reads only one page.
 - Which statement best elucidates the above?
 - There are many truths connected with life. Traveling outside will teach us some of them.
 - 2) if we consider the world as a book we have to read all the pages to understand the

contents. One page deals with travel.

- Compare the world to a big book that has all the aspects of learning about life.Travelling is one of the aspects that completes our learning.
- 4) We can learn many things from our parents, teachers and books. But travelling is a unique means of education that helps us to learn about the world and life.
- 17. Rich, not gaudy, apparel proclaimeth the man.

Which of the following sentences explains the above statement?

- 1) Well-dressed men are always impressive and welcome.
- We should wear clothes according to the occasion and place because our clothes show what we are.
- 3) The kind of clothes we wear always speak about our personality and attitude to life.
- 4) We should always dress elegantly to please others and win friends.
- 18. Uneasy lies the head that wears the crown.

What does this mean?

- 1) The crown worn by the king does not mean that he is a happy man.
- The king wears a crown of gold and gems but his responsibilities make him restless and unhappy.
- 3) People who are rich and powerful are generally restless and worried.
- Those who are in high positions and wealthy are mostly restless because of their responsibilities, like kings.
- The circumstances of birth are irrelevant. What you do with the gift of life, determines what you are.

Which statement best explains this?

- 1) One may be born rich or poor. But how he lives speaks of high real self.
- Misfortunes come even if we are born rich. But success in life depends on our own efforts to live a goodlife.
- 3) Birth alone does not contribute to success in life. Life is precious and is a free gift of God and we should make it worth living.
- 4) Great qualities are given by God as gifts. We should make good use of them to achieve success in life.
- 20. Your mind is like a parachute; it works best when it is open.

What dos the statement imply?

- 1) Parachutes are meant for saving lives and you have to open them to do that.
- Open mindedness is what is essential. We should share with others our joys, sorrows, fears and hopes to make life meaningful.
- We should never close our minds to others. When we share we become happier and contented.
- 4) Our minds are like parachutes closed. We must open them to share happiness.

Directions for question 21 to 25:

Directions for question 30 to 31:

In each of these questions, there are three sentences marked A, B and C. Find the two or three sentences which convey the same meaning.

- 30. A. The manager would like you to help him locate the fault.
 - B. If you help him locate the fault, the manager would like you.
 - C. The Manager desires that you should provide him the necessary assistance to locate the fault.
 - 1) A and B
 - 2) B and C
 - 3) A and C
 - 4) All the three
- 31. A. The judge remarked that not all the accused were really guilty.
 - B. The judge remarked that some of the accused were guilty while others were not.
 - C. The judge remarked that all those who are accused include some who are not really guilty.
 - 1) A and B
 - 2) B and C
 - 3) A and C
 - 4) All the three

Directions for question 32 to 35:

Each question has a sentence that has been scrambled and the scrambled parts have been marked A, B, C, D and E. Find the correct order of the parts to reconstruct the sentence.

- 32. A. in different regions of that federation.
 - B. that was Yugoslavia.
 - C. the fundamental cause has been the very large difference in the quality of life.
 - D. although the dismemberment of the federation.
 - E. is seen more as the result of an ethnic conflict.
 - 1) D, B, E, C, A
 - 2) C, E, B, D, A
 - 3) B, C, E, D, A
 - 4) A, B, D, E, C
- 33. A. but there is some merit in it

- B. as distinct from consumption
- C. the bifurcation of plan and non-plan funds
- D. in so far as it focuses attention on development expenses
- E. in the budget is artificial
- 1) D, C, A, B, E
- 2) C, D, B, E, A
- 3) C, E, A, B, D
- 4) D, E, A, C, B
- 34. A. like the industrialised countries
 - B. as if they are to be suffered as relics of a backward past
 - C. we have specially drawn attention to the non-motorized
 - D. because they are completely overlooked in transport planning
 - E. till replaced by faster petroleum fuelled transport
 - 1) D, E, A, C, B
 - 2) C, D, E, B, A
 - 3) C, B, A, D, E
 - 4) C, D, B, E, A
- 35. A. he was highly sensitive and resentful
 - B. towards the country or to those
 - C. when there was even implied discourtesy
 - D. while he was extremely gentle and tolerant
 - E. he held in honour
 - 1) A, C, D, B, E
 - 2) D, A, C, B, E
 - 3) E, A, D, C, B
 - 4) D, C, B, E, A

Directions for question 36 to 40:

For the given word at the top of each table, match the dictionary definition on the left (A, B, C, D) with their corresponding usage on the right (E, F, G, H). Out of the four possibilities given below the table, select the one that has all the definitions and their usage correctly matched.

36. Ground

	Meaning		Usage
A.	A basis for belief action or argument	E.	He was at a loss to explaining what grounds he had decided to take up the case
В.	Foundation	F.	He received a thorough grounding in the theoretical aspect before he was allowed to move on
C.	To provide a reason or justification for	G.	He realised he was on a shaky ground when the principal questioned him
D.	To instruct in fundamental principal	H.	The book has provided the philosophical ground for most of the Nazi policies

4) d

Directions for question 87 to 91: Study the following table to answer these questions.

Expenditure of a company (in lakh rupees) per annum over the given years

Item of expendiure

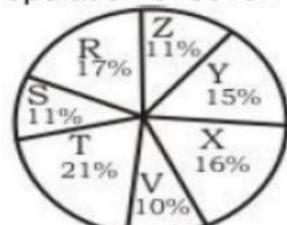

item of expendicie					
Year	Salary	Fuel and transport	Bonus	Interest on loans	Taxes
1998	288	98	3.00	23.4	83
1999	342	112	2.52	32.5	108
2000	324	101	3.84	41.6	74
2001	336	133	3.68	36.4	88
2002	420	142	3.96	49.4	98

- 87. The ratio between the total expenditure on Taxes for all the years and the total expenditure on Fuel and Transport for all the years respectively is approximately
 - 1) 4:7
 - 2) 10:13
 - 3) 15:18
 - 4) 5:8
- 88. The total expenditure of the company over these items during the year 2000 is
 - 1) Rs. 544.44 lakhs
 - 2) Rs. 501.11 lakhs
 - 3) Rs. 446.46 lakhs
 - 4) Rs. 478.87 lakhs
- 89. What is the average amount of interest per year which the company had to pay during this period?
 - 1) Rs. 32.43 lakhs
 - 2) Rs. 33.72 lakhs
 - 3) Rs. 34.18 lakhs
 - 4) Rs. 36.66 lakhs
- 90. Total expenditure on all these items in 1998 was approximately what per cent of the total expenditure in 2002?
 - 1) 62%
- 2) 66%
- 3) 69%
- 4) 71%

- 91. The total amount of bonus paid by the company during the given period is approximately what per cent of the total amount of salary paid during this period?
 - 1) 0.1%
- 2) 0.5%
- 3) 1%
- 4) 1.25%

Directions for question 92 to 96: Study the following pie-chart and the table to answer these questions:

Proportion of Population of seven villages in 1997

Village

% population below poverty line

X	38
Y	52
Z	52 42
R	51
S	49
T	46
V	51 49 46 58

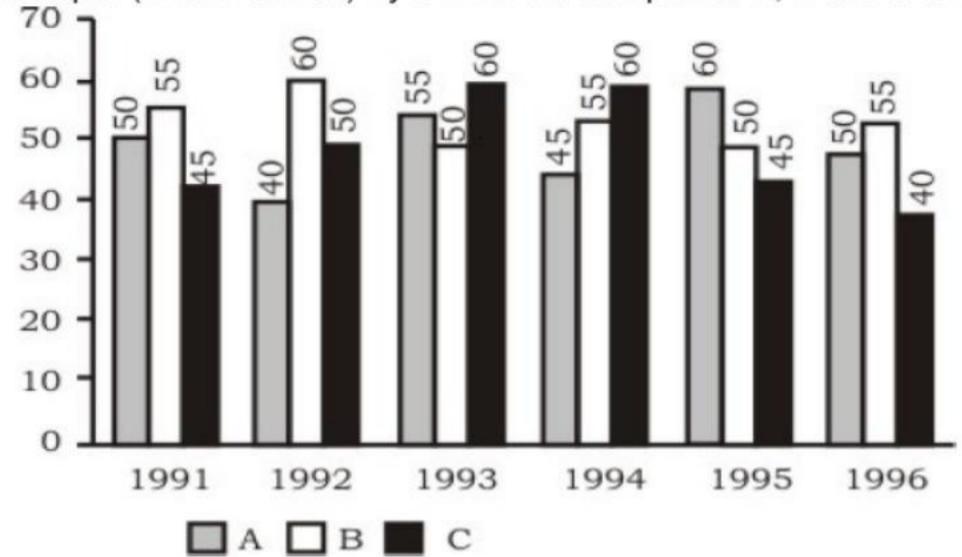

- 92. Find the population of villages S if the population of village X below poverty line in 1997 is 12160.
 - 1) 18500
 - 2) 20500
 - 3) 22000
 - 4) 26000
- 93. The ratio of population of village T below poverty line to that of village Z below poverty line in 1997 is
 - 1) 11:23
 - 2) 13:11
 - 3) 23:11
 - 4) 11:13
- 94. If the population of village R in 1997 is 32000, then what will be the population of village Y below poverty line in that year?
 - 1) 14100
 - 2) 15600
 - 3) 16500
 - 4) 17000
- 95. If in 1998, the population of villages Y and V increase by 10% each and the percentage of

population below poverty line remains unchanged for all the villages, then find the population of village V below poverty line in 1998, given that the population of village Y in 1997 was 30000.

- 1) 11250
- 2) 12760
- 3) 13140
- 4) 13780
- 96. If in 1999, the population of village R increase by 10% while that of village Z reduces by 5% compared to that in 1997 and the per centage of population below poverty line remains unchanged for all the village, then find the approximate ratio of population of village R below poverty line to the ratio of population of village Z below poverty line for the year 1999.
 - 1) 2:1
 - 2) 3:1
 - 3) 4:3
 - 4) 5:4

Directions for question 97 to 101: Study the following graph carefully to answer these question

Production Of Paper (in lakh tonnes) By 3 Different Companies A, B and C Over The Years

- 97. What tis the difference between the production of company C in 1991 and the production of company A in 1996?
 - 1) 50000 tonnes
 - 2) 50000000 tonnes
 - 3) 5000000 tonnes
 - 4) 500000 tonnes
- 98. What is the per centage increase in production of company A from 1992 to 1993?
 - 1) 37.5
- 2) 38.25
- 3) 35
- 4) 36

previous year the maximum for company B?

- 1) Rural
- 2) Rural and Metropolises
- 3) Semi-urban and Metropolises
- 4) None of these
- 106. The total number of candidates passed from Rural in 1993 and Semi-urban in 1990 was exactly equal to the total number of candidates passed from State capital in which of the following years
 - 1) 1990
 - 2) 1993
 - 3) 1994
 - 4) 1992

Directions for question 107 to 110:

The following pie charts exhibit the distribution of the overseas tourist traffic from India. The two charts show the tourist distribution by country and the age profile of the tourist respectively. Examine the charts carefully to answer those questions

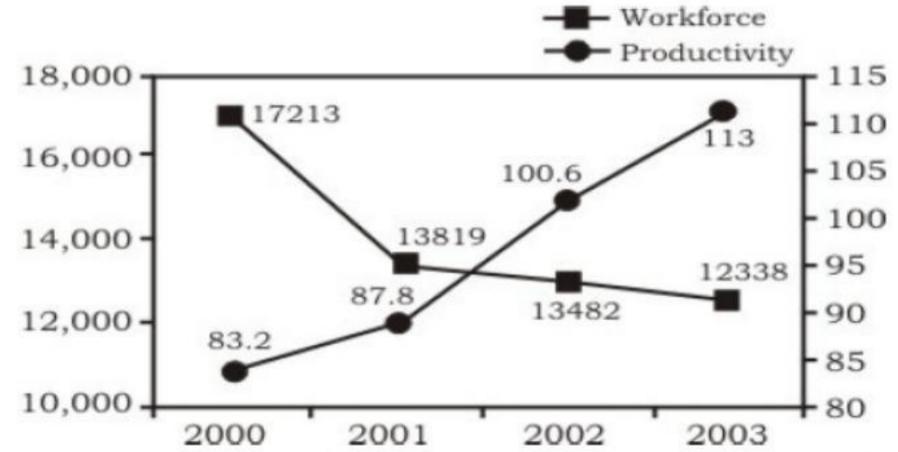

- 107. The ratio of the number of Indian tourists that went to USA to the number of Indian tourists who we below 30 years of age is
 - 1) 2:1
 - 2)8:3
 - 3)3:8
 - 4) cannot be determined
- 108. Amongst other countries, Switzerland accounted for 25% of the Indian tourist traffic. It is known from official. Swiss records that a total of 25 lakh Indian tourists had gone to Switzerland during the year. What is the number of 30-39 years old Indian tourists who went abroad in that year?
 - 1) 18.75 lakh
 - 2) 25 lakh
 - 3) 50 lakh
 - 4) 75 lakh
- 109. Based on the information in the above question, what was the volume of traffic of Indian tourists in the US?
 - 1) 150 lakh

- 2) 125 lakh
- 3) 200 lakh
- 4) None of these
- 110. On the basis of information in the above two questions, what can be inferred about the number of 50 + year old who visited UK during the year
 - 1) At least 25 lakh
 - 2) Exactly 25 lakh
 - 3) At least 10 lakh
 - 4) Cannot be determined

Directions for question 111 to 113 : Study the line graph below to answer these Question :

- 111. By how much percentage has production changed (approximately) in 2003 as compared to its value for 2000?
 - 1) -3%
- 2) +5%
- 3) 0%
- 4) +7%
- 112. The percentage change in which of the mentioned areas is the highest over the period 2000-2003
 - 1) Work force
 - 2) Productivity
 - 3) Production
 - 4) Both (1) and (2)
- 113. Which two variables have moved in the same direction in the mentioned period?
 - 1) Workforce and productivity
 - 2) Workforce and production
 - 3) Production and productivity
 - 4) None of these

Directions for question 114 to 120:

Each of these questions has a problem and two statements, number I and II. Decide if the information given in the statement is sufficient for answering the problem. Mark the answer as

(a)	If statement I by itself is sufficient to answer the question, but statement II by itself is
not	

- (b) If statement II by itself is sufficient to answer the question, but statement I by itself is not.
- (c) If statements I and II taken together are sufficient to answer the question, even though neither statement by itself is sufficient.
- (d) If either statement by itself is sufficient to answer the question.

What is the va	lue of x ?		
$1 y^2 = 4$			
II $y = 2$			
1) a	2) b	3) c	4) d

115. A list contains 11 consecutive integers. What is the greatest integer on the list?

I. If x is the smallest integer on the list, then $(x + 72)^{1/3} = 4$.

II. If x is the smallest integer on the list, then $1/64 = x^{-2}$.

2) b

116. If a rectangle has length a and width b, what is its area?

I. 2a = 15/b

II. a = 2 b - 2

1) a 2) b 3) c 4) d

117. What is the ratio of men to women enrolled in a certain class?

 The number of women enrolled in the class is 3 less than half the number of men enrolled.

3) c

4) d

II. The number of women enrolled in the class is 2/5 of the number of men enrolled.

1) a 2) b 3) c 4) d

I. 2a - b = 3 II. a = b - (1 - a)

1) a 2) b 3) c 4) d

119. If $a \neq b$, what is the value of a + b1. a^2 - $(b^2 \div a) = b = 6$

114. If -(3/4)x + 3y - (1/2) = (3/2) y - (1/4) x

II. $(a + b)^2 = 36$

118. What is the value of b?

1) a

1) a 2) b 3) c 4) d

120. If 22^{m+1} , 2^{n+2} , what is the value of m + n ?

I. $2^{3n-1} = 256$ II. $2^{m+2n} = 256$

	1) a	2) b	3) c	4) d
